

Hydrometric Consulting Services PTY LTD

A.C.N. 091 437 071

ABN 16 091 437 071

Are you sure that the instruments taking your valuable measurements are accurately calibrated and operating within manufacturer's specifications? Hydrometric Consulting Services PTY LTD will ensure that you have confidence in your measurements by providing a calibration service for your instrument systems. We are specialists in the calibration of:

LEVEL sensors for water measurement applications, including ultrasonic level systems, hydrostatic sensors and gas bubblers.

PRESSURE transmitters and transducers for pipe, reservoir, tank and water level measurement.

FLOW meters in open channels and pipes for water, sewage and trade waste applications.

WEIRS and FLUMES in man made and natural channels.

RAINFALL gauges and rain Sentries on flood warning, data collection systems and trade waste applications.

WATER QUALITY sensors in streams, reservoirs and treatment plants.

All calibrations are carried out utilising the most up-to-date calibrating equipment and a quality service at a competitive price is guaranteed. Hydrometric Consulting Services PTY LTD also provides an installation and maintenance service which will meet the needs of your business.
